WHAT BRAINSTORMING?

Brainstorming Rules!

1. No more than
30min per session.

6:23 pm

2. Defer Judgement.

Turn of your critical filters, we are not looking to evaluate at this point.

"No Buts!"

3. Encourage Wild Ideas.

Wild ideas are good for new inspiration, even if they are hard to be implemented.

4. Build On The Ideas Of Others.

Don't be afraid of adding to someone else's idea.

"Yes, And..."

PRECISE POINTING
(halkey+?)
slide finger show pointer

5. Stay Focused On Topic.

Remember the question you are trying to solve.

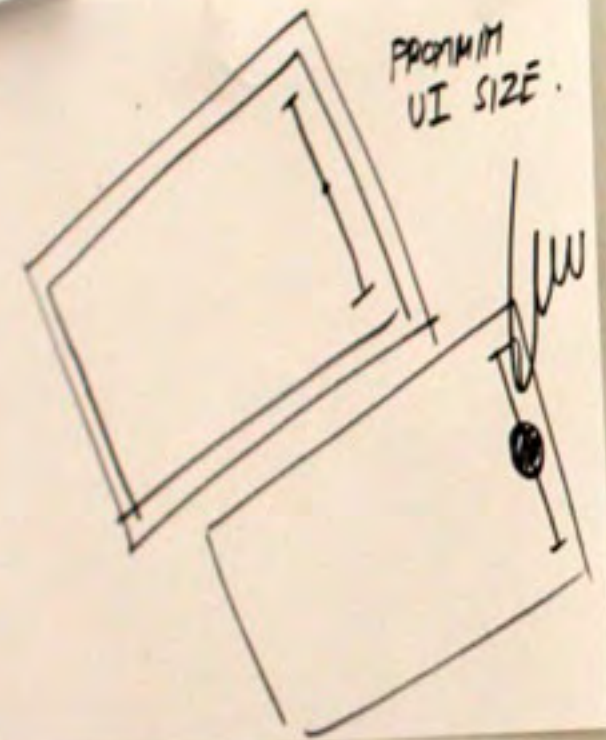

A group of people are seated around a long table in a meeting room. In the background, there are whiteboards and a blackboard covered with sticky notes and diagrams. A large potted plant is visible on the left side of the room. The room has a modern, industrial feel with exposed wooden beams.

6. One Conversation At A Time

Don't interrupt people or talk
over them.

7. Be Visual

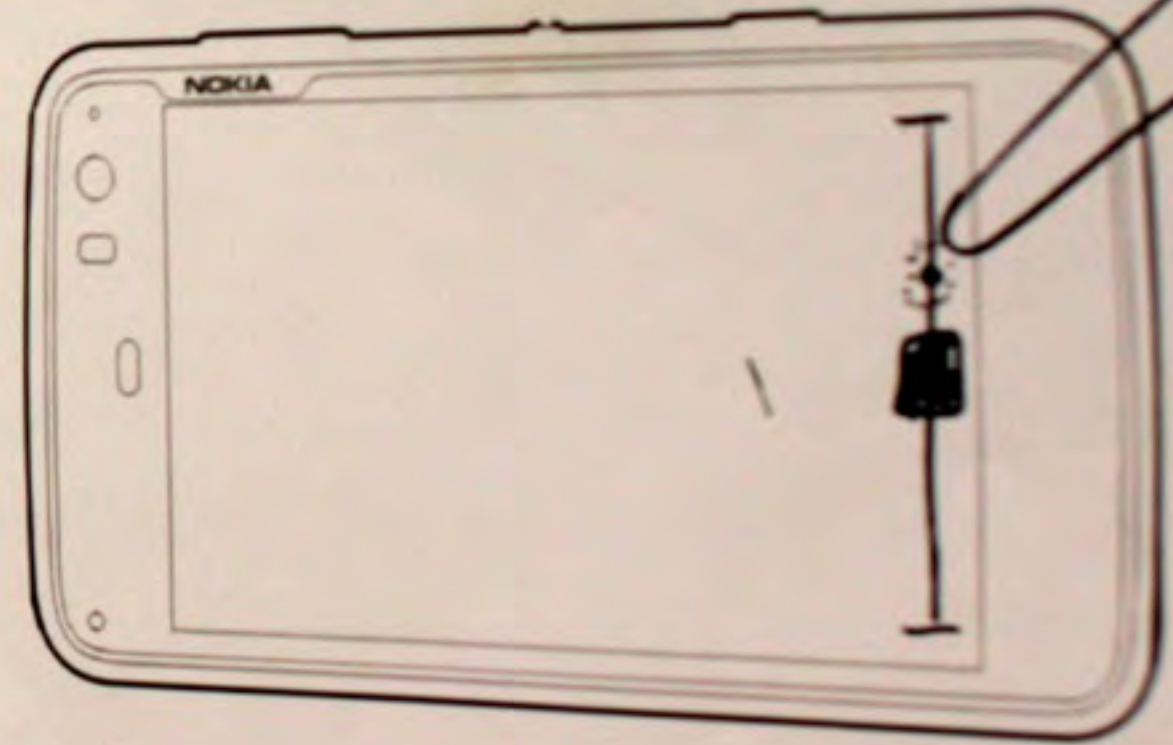

It's not art, it's about communicating your idea to the rest of the team and so you can remember it later.
